Compliance Checklist

Things you should check to make sure your site is accessible.

- **Provide text alternatives for non-text content (images, videos)**
- **Ensure sufficient color contrast between text and background**
- **Make all functionalities available via keyboard navigation**
- **Included descriptive link text**
- **Use headings to structure your content clearly**
- **Ensure forms have accessible labels and error messages**
- **Provide captions and transcripts for multimedia content**
- **Use ARIA roles and attributes appropriately**
- **Ensure that the site is navigable and readable on all devices**
- **Conduct an accessibility audit using recommended tools**
- **Stay up to date with the latest accessibility guidelines**
